Technical data sheet

BS FIX 220.012 TW

Total thickness (carrier + adhesive): 0.17 mm

Main carrier: TRANSPARENT PET FILM
Secondary carrier: -
Main liner: WHITE SILICONIZED GLASSINE PAPER
Secondary liner: -
Open side adhesive: PURE ACRYLIC
Closed side adhesive: PURE ACRYLIC

Adhesive properties

Peel 90° on steel
- Open side: 14 M.U. (N/25 mm) BS 35 - AFERA 5001
- Closed side: 14 M.U. (N/25 mm)

Rolling ball test
- Open side: 2 M.U. (Cm) BS 12 - PSTC-6
- Closed side: 2 M.U. (Cm)

Quick stick on steel
- Open side: 20 M.U. (N/25 mm) BS 6 - AFERA 4015
- Closed side: 20 M.U. (N/25 mm)

Shear on steel
- Open side: 20 M.U. (Hours) BS 68 - AFERA 5012
- Closed side: 20 M.U. (Hours)

Temperature resistance

Long term: 120 M.U.: °C
Short term: 160 M.U.: °C

Mechanical properties

Tensile strength at break
- Longitudinal: Min. 2000 Kg/cm², Max. 3000 Kg/cm² ASTM D 882
- Transversal: Min. 2000 Kg/cm², Max. 3000 Kg/cm² ASTM D 882

Elongation at break
- Longitudinal: Min. 90 %, Max. 170 % ASTM D 882
- Transversal: Min. 90 %, Max. 160 % ASTM D 882

BiesSse Tape reserve the right to introduce at any moment and without warning those changes that they deem necessary. Tolerance of Technical Data: ± 30%
BS FIX 220.012 TW

Description

The product is made up of a calibrated thickness polyester cloth carrier and a white siliconized glassine paper liner.

The acrylic adhesive system, on both sides, provides high adhesion and initial tack, allowing optimum adhesion on slippery and LSE plastic materials.

Applications

Ideal for flying splice application of plastic materials that are normally difficult to adhesivize because they are slippery and/or have low surface tension.

Recommended for a wide variety of materials: irregular surfaces, plastics, metal profiles, decorative coatings.

The product guarantees a permanent bond on foams, insulating coatings, paper, plastic, metals, sail fabrics and composite materials subject to a wide range of environmental conditions.

Product PLUS

High initial tack.

Good resistance to thermal stress and UV rays exposure.

Recommendations for correct use

Storage

For a proper storage of the product we recommend to keep the product in the original package until it is needed and use it within 12 months from delivery.

The storage shall be carried out at a room temperature between 15°C and 27°C, and a relative humidity < 60%.

Once removed from the packaging, place the product vertically and protect it from dust. Do not expose product and packaging to direct sunlight and heat sources.

Surface cleaning

The product shall be applied on sufficiently flat surfaces and with no non-stick coating.

In order to obtain a correct product adhesion level on surfaces, it is indispensable that the surfaces are properly cleaned before the application. It is recommended to use quick-evaporating solvents.

After cleaning make sure that the solvent has completely evaporated, by waiting for a sufficiently long period of time or by drying the surface with a completely dry cloth.

Application

As adhesive tape is pressure-sensitive, it is necessary a proper pressing pressure on the back of the tape, once applied on the surface, to ensure the grip of the adhesive and a full lamination.

Measuring tolerances

The tape cutting width tolerance can vary within a range of ±0.7 mm. Tighter tolerances for specific formats and measures can be available on request.

Disposal

It is recommended to dispose the product after use according to the specific regulations of the country it was used in.
