

Technical data sheet

Total thickness (carrier + adhesive): **2.5mm**

MS FOAM 2100 PET

Main carrier:	BLUE PE FOAM
Secondary carrier:	WHITE PET FILM
Main liner:	-
Secondary liner:	-
Open side adhesive:	-
Closed side adhesive:	PURE ACRYLIC

Adhesive properties

Peel 180° on steel		Open side	-	M.U.	Method
		Closed side	-	N/25 mm	-
Rolling ball test		Open side	-	M.U.	Method
		Closed side	-	Cm	-
Quick stick on steel		Open side	-	M.U.	Method
		Closed side	-	N/25 mm	-
Shear on steel		Open side	-	M.U.	Method
		Closed side	-	Hours	-

Temperature resistance

Technical data sheet

Total thickness (carrier + adhesive): **2.5mm**

MS FOAM 2100 PET

Description

The product is made up of a high quality closed-cells physically cross-linked blue expanded polyethylene foam carrier, laminated with a white polyester film (Mylar).

Foam width: 1280 mm
Mylar width: 1400 mm (60 mm+60 mm)

Applications

Ideal for high quality corrugated postprint.

Reccomended to reduce dot gain and washboard effects.

Suitable for different plate thickness.

Product PLUS

Excellent slipping on the printing cylinder.

Optimal resilience and high compression stability even at high print speeds to avoid cardboard crushing.

Recommendations for correct use

Storage

For a proper storage of the product we recommend to keep the product in the original package until it is needed and use it within 12 months from delivery.

The storage shall be carried out at a room temperature between 15°C and 25°C, and a relative humidity < 65%.

Once removed from the packaging, place the product vertically and protect it from dust. Do not expose product and packaging to direct sunlight and heat sources.

Surface cleaning

The product shall be applied on sufficiently flat surfaces and with no non-stick coating.

In order to obtain a correct product adhesion level on surfaces, it is indispensable that the surfaces are properly cleaned before the application. It is recommended to use quick-evaporating solvents.

After cleaning make sure that the solvent has completely evaporated, by waiting for a sufficiently long period of time or by drying the surface with a completely dry cloth.

Application

As adhesive tape is pressure-sensitive, it is necessary a proper pressing pressure on the back of the tape, once applied on the surface, to ensure the grip of the adhesive and a full lamination.

Measuring tolerances

The tape cutting width tolerance can vary within a range of ± 2.0 mm. Tighter tolerances for specific formats and measures can be available on request.

Disposal

It is recommend to dispose the product after use according to the specific regulations of the country it was used in.
